

# THE TOP 5 FEATURES OF SAP BUSINESS ONE 9.0

## FEATURING WAREHOUSE MANAGER BOB

1

### Advanced Account GL Determinations in a Centralized Module

Enhance usability through account determinations such as BP groups, item groups, items, warehouses, shipping, and federal tax IDs.

2

### Accurate Inventory Counts

Increase accuracy by setting up cycles to indicate when inventory is to be counted based on warehouse code and item groups.

3

### Effective Bin Location Tracking

Improve efficiency in managing inventory down to the "wing," "section" and "shelf" level of a warehouse with assigned custom attributes.

4

### Shipping of Multiple Units of Measurement

Enhance operational flexibility with unlimited global and product specific units of measurement.

5

### Performance and Infrastructure Enhancements

Boost application efficiency and increase data security through Client and DIAPI enhancements to compatibility, RAM support, application process speed, and single sign-on functionality.
