

## Item Code Turns 50

Struggling with the need to assign meaningful codes to items and at the same time to keep it short? Well, you can stop struggling.

The Item No. field and related fields such as BP Catalog No. & Manufacture No. are extended to 50 characters, allowing you more flexibility and freedom when assigning codes.

The screenshot shows the 'Item Master Data' window in SAP. The 'Item No.' field is highlighted with a purple box and contains the value 'A00001'. Below the main form, a status bar at the bottom of the window shows 'Item No. (50 Characters)' also highlighted with a purple box. The form includes various fields such as Description ('J.B. Officeprint 1420'), Item Type ('Items'), Item Group ('J.B. Printers'), and checkboxes for 'Inventory Item', 'Sales Item', and 'Purchase Item'. The 'Advanced Rule Type' is set to 'Warehouse'.

Available since SAP Business One 9.2, version for SAP HANA PL03, and SAP Business One 9.2 PL03.
