

The Pick List is Only Right Click Away

The pick lists are closer than ever. Need to generate a pick list for a production order? Just open it and choose from the context menu "Generate Pick List":

The screenshot shows the SAP Production Order window. The top section contains fields for Type (Standard), Status (Planned), Product No. (LM4029), Product Description (LeMon 4029 Printer), Planned Quantity (5), Warehouse (01), No. (Primary 152), Order Date (12/10/2009), Due Date (12/20/2009), User (Jayson Butler), Origin (Manual), Sales Order, Customer, Distr. Rule, and Project.

The main table displays components with the following data:

#	Type	No.	Description	Base ...	Planned...	Issued	Avail...	UoM ...	Wareho...
1	Item	LM4029MC	Memory Chip	2	10		267		01
2	Item	LM4029D	LeMon 4029 500 shee	1	5		696		01
3	Item	LM4029PH	LeMon 4029 Printer P	1	5		704		01
4	Item	LM4029PS	LeMon 4029 Printer P	1	5		62		01
5	Item	LM4029SB	LeMon 4029 Printer S	1	5		623		01
6	Item								

A context menu is open over the table, listing options: Cancel, Duplicate, New Activity, Related Activities, Transfer Request, Component Transfer, Relationship Map..., **Generate Pick List** (highlighted with a red box), and View Pick Lists.

At the bottom, there are fields for Remarks and Pick and Pack Remarks, and buttons for OK and Cancel.

The pick list appears, waiting for your further processing:

This option is also available in sales orders, A/R reserve invoices, and inventory transfer requests. In addition, the option "View Pick Lists" which is available in the context menu of these documents, enables you to display the pick lists that were already created for the given document.

Available since SAP Business One 9.1, version for SAP HANA PL04 and SAP Business One 9.1 PL04
