

What Do You Really Know About Your License?

As a partner or system administrator you need to know at a glance which license is assigned to each user, and which users are connected to the company database at a given time.

SAP Business One introduces the Assignment tab (in Administration > License > License Administration) which indicates the licenses assigned to each user and shows the total number of assigned licenses as well as the number of free licenses.

#	User Code	Locked	Professional
19	keiko	No	
20	keith	No	
21	leo	No	
22	linda	No	
23	manager	No	✓
24	maria	No	
25	mary	No	
26	merlina	No	
Total Assigned			1
Total Free			1

The Connected Clients report (Administration > Utilities > Connected Clients) lists all the clients that are currently connected to the company database, their assigned licenses, the client IPs and much more. Here you can also disconnect selected users or processes – for example if an upgrade must take place and the user didn't log off, or send pop up message to users operating selected clients.

Connected Clients

Current Company 192.168.157.146(TLVV33954466B)

Select the clients that you wish to disconnect from current company.
Note that only SAP Business One clients can be selected for disconnection
