

SAP Business One – Vision33 Cloud

Multi-Tenant Edition (MTE)

SAP Business One is a flexible, customisable, and easy-to-use enterprise resource planning (ERP) solution designed specifically for growing small to mid-sized businesses and trusted by over 72,000+ companies around the world. Every aspect of your business – financials, accounting, sales, purchasing, inventory, warehouse, CRM, and more – together under one platform. Robust reporting capabilities and real-time information allow you to make fast, informed decisions.

Take your business to the next level without the cash crunch.

- One fixed price monthly fee
- Fast deployment to get you up and running in weeks
- Full ERP capabilities
- Hosted in our Safe Secure AWS Cloud
- Upgrades maintained by Vision33 allowing you to focus on business
- Seamless access for you and your team

This scalable, proven solution is now available in a true cloud environment, powered by Amazon Web Services (AWS). SAP Business One delivers the functionality to transform your business by leveraging information to maximise efficiency, reach new customers, and drive profitable growth. And with a multi-tenant cloud deployment option, the solution is more affordable than ever.

The Vision33 multi-tenant cloud edition utilises the SAP HANA database and provides access to the Saltbox Platform for integration with your other mission-critical applications. This edition is available for SAP Business One user licenses in UK, US, and Canadian localisations.

Want to extend SAP Business One to your customers, vendors or remote sales staff? Vision33 offers our Customer, Employee and Vendor Portals that integrate with SAP Business One. Quickly process new orders, track deliveries, accept online payments, manage vendors and allow sales staff to access data anytime, anywhere.

If your business has considered implementing an ERP solution, cloud deployment may be the best option. Your remote team members are likely challenged to access desktop solutions like QuickBooks, Peachtree or Simply Accounting. SAP Business One in the AWS cloud offers scalability, stability and anywhere access at an affordable price.

About SAP HANA

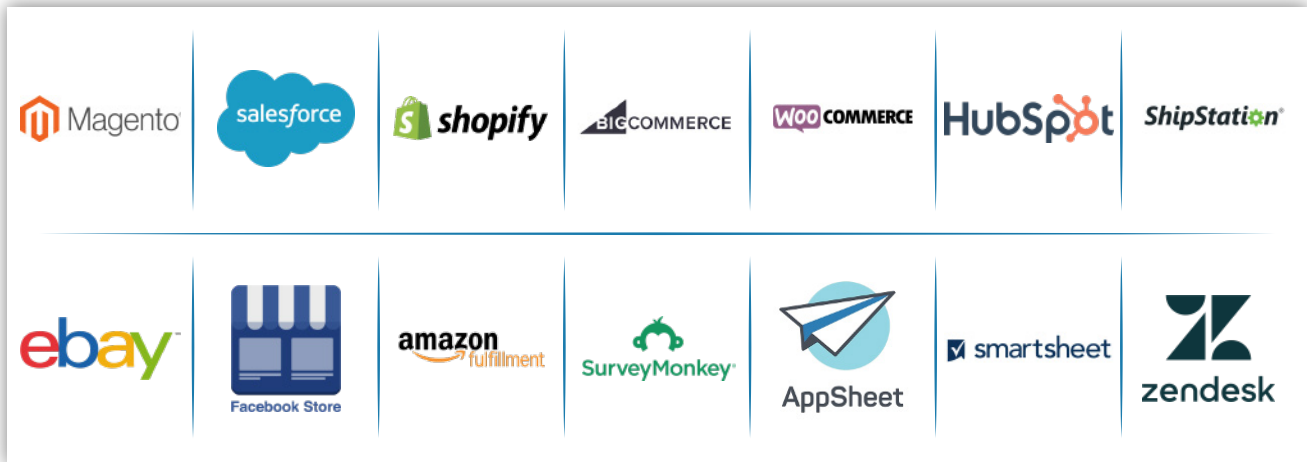

SAP HANA is the in-memory computing platform for SAP Business One that supercharges the application performance for speed and allows you to analyse massive amounts of data in real time. SAP Business One powered by SAP HANA eliminates layers of complexities and unnecessary business costs in legacy IT architecture so your business can run smarter, faster, and simpler.

Integration Made Easy.

The Saltbox Platform is Vision33's cloud-based, integration-as-a-service platform that eliminates human error and maximises your SAP Business One investment. Saltbox seamlessly connects SAP Business One and your mission-critical business applications so you can transfer data at lightning speed.

- Extend your business through eCommerce solutions such as;
 - Shopify
 - Amazon Marketplace
 - Magento
 - And more
- Seamless Integration with shipping solutions such as ShipStation
- ZenDesk, SmartSheet, Hubspot and many more plug and play solutions available

Some of the integrations available through Saltbox include:

The options for connectivity are endless with Saltbox. Vision33 can even leverage The Saltbox Platform to create custom endpoint connections for your unique business application.
