

Private Cloud for SAP Business One

Cloud hosting for companies with more complex business needs.

SAP Business One is an easy-to-use, integrated enterprise resource planning (ERP) solution for growing small and mid-sized businesses. Over 80,000 companies worldwide rely on SAP Business One to run everything from financials and sales to inventory.

Vision33 has developed a robust infrastructure to deliver the rich functionality of SAP Business One in a fully managed, hosted cloud environment—Private Cloud for SAP Business One—so you can efficiently run your business from anywhere, anytime.

Powered by Amazon Web Services (AWS) and supported by tier 1 technologies like CrowdStrike, our cloud hosting platform is trusted globally by over 13,000 SAP Business One users.

What's in the box?

Did you know?

Vision33 was the first SAP Business One partner to deploy SAP Business One in the cloud and the first to earn the AWS SAP competency badge.

Performance guarantee

Vision33 will proactively review and adjust system resources, including storage, network connectivity, bandwidth, user licensing, and computing power, at no extra cost during your active subscription term.

Customized to your business*

From site-to-site VPN and advanced security options to app integrations and add-ons, your Private Cloud for SAP Business One solution is customizable to support your company's exact requirements.

**Additional infrastructure requirements and costs apply.*

Affordable, predictable pricing*

Priced per user and billed monthly, quarterly, or annually, subscription costs are predictable and affordable.

**Paid ERP upgrades are required every 3 years (option to roll upgrade costs into monthly subscription payments).*

Ironclad security

Our security software and services meet the highest standards to create a nearly impenetrable barricade around your business. We comply with international data privacy rules, run daily backups, and offer enhanced protection measures like database encryption, multi-factor authentication, continuous monitoring, and long-term storage, making data loss and downtime nearly obsolete.

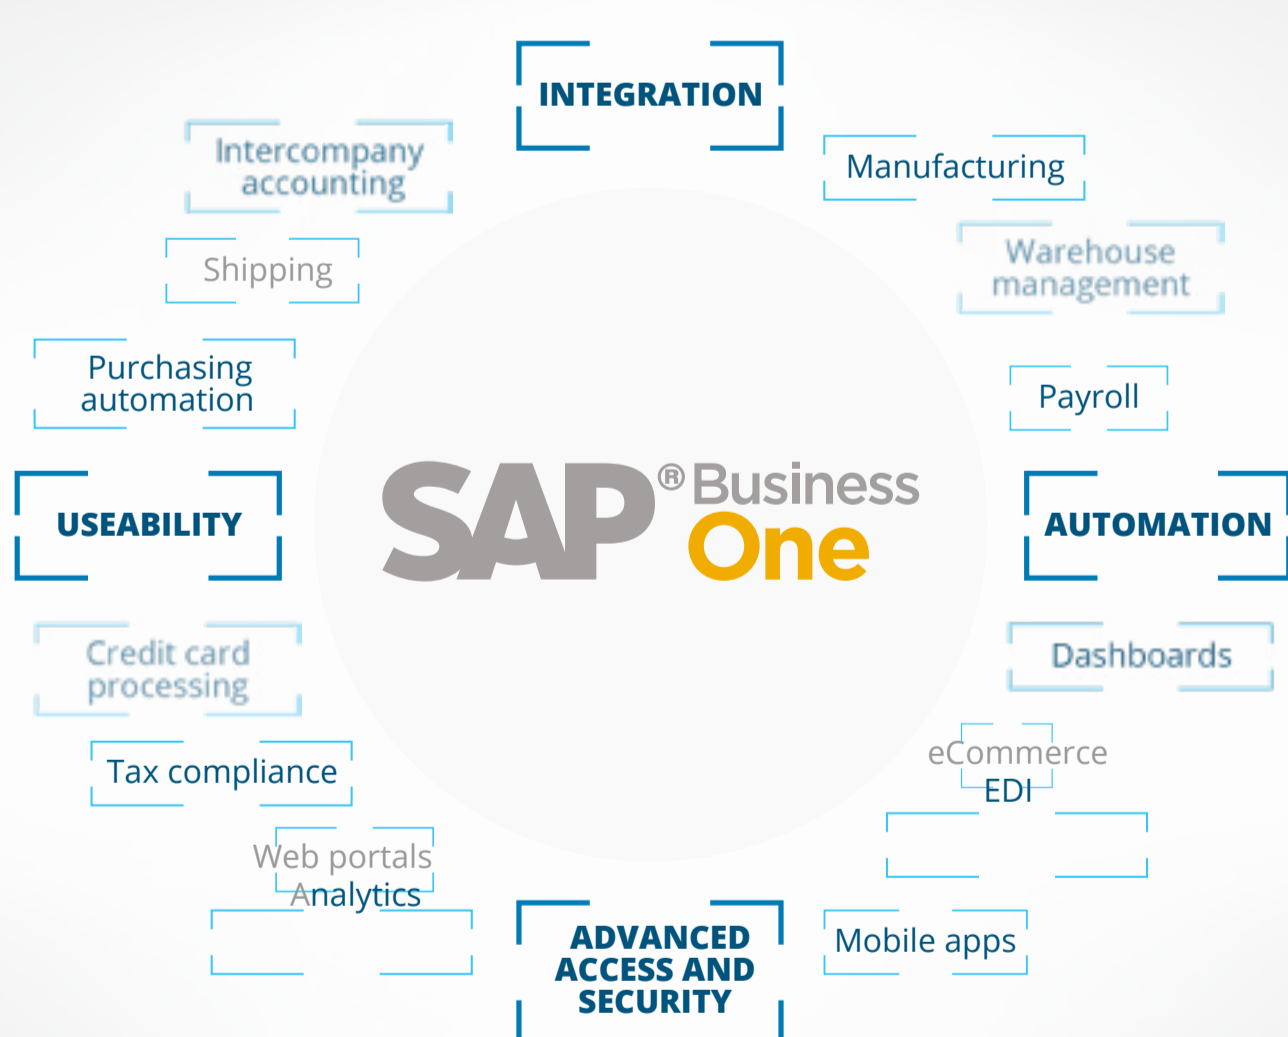

Regional cloud hosting

Choose where to host your SAP Business One environment (US, Canada, or EU) to support compliance, reduce cross-border risk, and maintain stronger control over data location, access, and governance.

Tell us your requirements and we'll build the right solution for your business.

Vision33 Private Cloud for SAP Business One supports countless enhancements, add-ons, and third-party solutions to tackle almost any business requirement. Our experienced team will identify the right mix of technologies for your business.
