

Public Cloud for SAP Business One

Affordable, fully managed cloud hosting.

SAP Business One is an easy-to-use, integrated enterprise resource planning (ERP) solution for growing small and midsized businesses. Over 75,000 companies worldwide rely on SAP Business One to run everything from financials and sales to inventory.

Vision33 has developed a robust infrastructure to deliver the rich functionality of SAP Business One in a fully managed, hosted cloud environment – Public Cloud for SAP Business One – so that you can efficiently run your business from anywhere, anytime.

Powered by Amazon Web Services (AWS) and supported by tier 1 technologies like CrowdStrike, our cloud hosting platform is trusted globally by over 12,000 SAP Business One users.

What's in the box?

Technologies

- TOTAL Care customer support
- 24/7 system health and security monitoring
- Daily backups

Did you know?

Vision33 was the first SAP Business One partner to deploy SAP Business One in the cloud and the first to earn the AWS SAP competency badge.

Performance guarantee

Vision33 will proactively review and adjust system resources, including storage, network connectivity, bandwidth, user licensing, and computing power, at no extra cost during your active subscription term.

Always up to date

With Vision33's Public Cloud solution, your ERP and hosting environment are never outdated. Vision33 updates your software and underlying infrastructure annually (at a minimum). Critical OS and security patching are performed as needed.

Affordable, predictable pricing

Priced on a per-user basis and billed monthly, quarterly, or annually, subscription costs are predictable and affordable.

Ironclad security

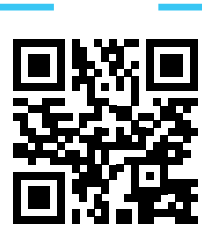

Our robust security software and services meet the highest standards to create a nearly impenetrable barricade around your business. We comply with international data privacy rules, run daily backups, and offer enhanced protection measures like database encryption, multi-factor authentication, continuous monitoring, and long-term storage, making data loss and downtime nearly obsolete.

We've thought of everything, so you don't have to.

Industry-leading services

Public Cloud for SAP Business One has a robust suite of managed cloud services to protect and support your ERP solution from top to bottom.
